

RANDOM NUCLEATED MASTERBATCHES for POLYPROPYLENE

NASSOLKEM KLARITONE™ Random Clarifier MasterBatches

True Universal Color-n-Additive MasterBatches

PRODUCT INFORMATION

RANDOM NUCLEATED MASTERBATCHES for POLYPROPYLENE

NASSOLKEM KLARITONE™ Random Clarifier MasterBatches

PRODUCTS

- a) **KLARITONE™ KK** : Highest transparency in Polypropylene, Excellent clarity.
- b) **KLARITONE™ KL** : Similar product with excellent gloss.
- c) **KLARITONE™ KMN** : New generation Highly effective Sorbitol Free Nucleating MasterBatch.
- d) **KLARi COLOR™** : Nucleated Random transparent colors for PolyPropylene.

KLARITONE™ MasterBatches are high performance clarifying agents for use in Polypropylene.

Virtually no odour MasterBatches, they are the combination of 2nd & 3rd generation chemistry of nucleation & clarifying technology, which results in achieving Polypropylene the look of high clarity plastics like GPPS and PC.

Nassolkem has capability of producing 3rd generation Nucleating Agents inhouse which ensures best results.

KLARITONE™ KMN is highly effective new generation Sorbitol free MasterBatch. Highest Clarity & Lowest dosage are the main benefit of this product. It can also be used in Thicker parts to look transparent.

Salient Features :

- 1) Highest clarity in Polypropylene.
- 2) No Odour.
- 3) Products made with our MasterBatches can also be used in Microwave.
- 4) Superior hot fill properties.
- 5) Suitable for universal use in Polypropylene i.e. injection molding, thinwall injection molding, extrusion, blow molding, injection stretch blow molding, sheet extrusion, thermoforming & also suitable for PP blown & cast films.
- 6) Processing simplicity.
- 7) Inhouse capability to produce Nucleating agents to ensure consistent quality.
- 8) FDA & RoHs approved..

KLARI COLOR™ are Color nucleated random transparent MasterBatches available in more than 60 shades including Fluorescent colors, Normal colors, Glitter colors which imparts complete transparency with innovative styling effects.

Application of **KLARI COLOR™** random color MasterBatches includes household to packaging & suitable in injection molding, extrusion, injection stretch blow molding & also in PP blown films.

These colors are completely non migrative in nature. High gloss with enhance clarity are added advantage of **KLARI COLOR™**.

Salient Features of KLARI COLOR™ random color MasterBatches:

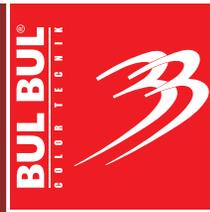

- 1) Highest transparency & clarity.
- 2) Broadest color range includes fluorescent, glitter & normal transparent colors in wide range.
- 3) No odour.
- 4) No migration of color.
- 5) No need to add separate nucleating agent MasterBatch.
- 6) Suitable for all application in Polypropylene.

Dosage : 1% to 2%

FDA Status : (✓)

Shelf life : Long Life
